What Are We Doing?

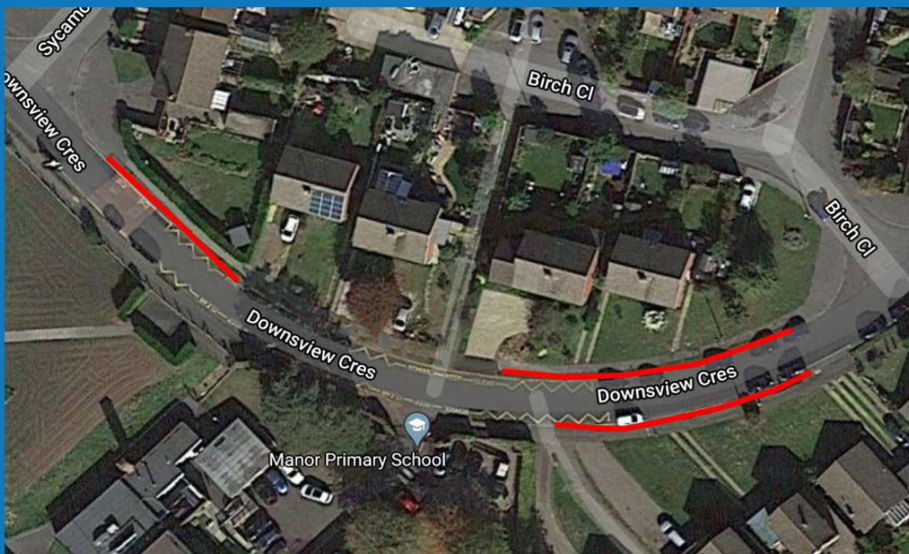

We will be carrying out grass verge reinforcement works on Downsview Crescent, Uckfield. The areas we will be working on are highlighted on the map in red.

We will be using a plastic material which allows the grass to regrow, whilst providing a more solid surface.

Work will start on Saturday 19th December 2020 and continue for up to 11 days. We will be working weekends. There will be a break over Christmas.

After they've been reinforced, the verges will require top soil and seeding. The seeding will take place in April 2021. Barriers will need to remain in place whilst the seed germinates and establishes.

The road will remain open with footway closures in place. Access for residents will be unaffected.

How did we do?
